EXCLUSIVE HIGH-PERFORMANCE CUPRO NICKEL HEAT EXCHANGER

1111

Agua para el futuro

DURABLE YET LIGHTWEIGHT

Built with a durable cupro nickel heat exchanger as standard, H-Series 135,000 BTU heaters offer exceptional protection against corrosion and premature failure caused by unbalanced water chemistry, ensuring you get season after season of premium heating performance.

FASTANDEASY OPERATION

H-Series 135,000 BTU heaters boast industry-leading hydraulic performance coupled with faster speed-to-heat capability. Their intuitive electronic panel is also quick and easy to operate, so pool owners can spend less time messing with controls and more time relaxing in the water.

ENVIRONMENTALLY FRIENDLY DESIGN

Engineered with "totally managed" water flow, H-Series 135,000 BTU heaters save energy (and money) by reducing pump run time. Their low NOx emissions meet air quality standards in all low-NOx areas, so you can rest easy knowing their environmental impact is low.
