

ZLGAC-B

Granular Activated Carbon

Applications

Water treatment

Decoloration

Gas Purification

ZLGAC-B is used for water treatment industry :

- Mineral water plant
- Tap water treatment
- water treatment
- Drink water treatment
- Filter element manufacturer

Description

ZLGAC-B is the most main purpose is the adsorption and purification. The basic purpose is to Air treatment, Drink water treatment. Our clients are mostly used in Mineral water plant, water plant, filter factory.

Packaging/Transportation

Standard Packaging in 25 Kg or 500kg each PP Bag with Inner Liner Activated Carbon (NOT REGULATED)
 Import/Export Classification: 3802.10.0000
 (HS Tariff Classification) CAS # 64365-11-3

Specifications

	ZLGAC-B
Size, mesh	8*30
Iodine Value, mg/g	1000
Moisture, %	5 (max)
Ash, %	10(max)
Handress, %	95(min)
Bulk Density, kg/m ³	450-550

Certificate

We are certified by BV, SGS, KOSHER, FDA, ISO9001, ISO14001, HALAL, CE, NSF etc.
